DESIGN CONCEPTUALS

SCOPE OF WORK:

Replacement of very old traffic signal hardware with new, state-of-the-art, equipment within the Central Business District. Project also includes the installation of conduit and fiber optic cable to add several signalized corridors to the City's Computerized Traffic Responsive Traffic Control System (CTRACS). Design consultant will study and propose the installation of 4 to 5 new signalized intersections in the Central Business District. The project will also tie the City's CTRACS to PennDOT's Freeway Surveillance System.

STATUS: Preliminary Engineering to begin Summer 2008.

SCHEDULE:

Fall 2009	Complete Preliminary Engineering
Fall 2012	Complete Final Design
Spring 2013	Start Construction
Fall 2014	Complete Construction
